**Is your
phone
system
putting
your
business
on hold?**

So what can Calyx do for you?

46% of customers who leave do so because of poor communications

72% of business callers will not wait more than 2 minutes for a call to be answered

You are throwing away up to **42%** of your phone bills to mobile numbers

ISDN

- Your customers can dial any desk phone or department directly – freeing up your receptionist or telephone operator
- You can have any incoming calls transferred automatically to a mobile number – great for when you're on the road or simply not at your desk
- You can set your phone so all calls will be automatically forwarded to another number – ideal for when you're at a client location all day
- You can identify callers before you answer the phone – essential for those really important clients.

VoiceMail

- Callers who are trying to reach you can leave a message – ideal for when you're on another call, or when you just can't make it to the phone
- You can retrieve your messages even when you're not at your desk
- You can leave a specific greeting or message for callers – very useful for

reassuring customers that you will get back to them.

GSM Gateway

- Call mobile phones from your business? A GSM Gateway can reduce your bills by as much as 42%. You'll wonder how you ever did without it!

12BTX Executive

- Display for viewing incoming numbers
- Hands-free operation
- Paging
- 4 display prompt keys
- 22 soft keys.

Basic Station

- Hands-free operation
- Paging
- 'Message waiting' indicator
- Features accessed using codes.

Here's how to improve your business systems by 100%

- Allow your customers to get through directly to the person or department they seek
- Help your receptionist to multi-task
- Empower staff to make better use of the internal telephone system
- Discover how many calls your business receives each day
- Analyse how long it takes for the average call to be answered
- Find out how many customers hang up in frustration while waiting for their calls to be answered
- Let your customers listen to music when they are on hold
- Give customers useful information when they are on hold – for example, services offered by your business.

You can add to or subtract from any of these bundled offers - call us for a revised quote.

And it all starts with a call to Calyx Voice, the largest and most experienced independent telecoms company in Ireland. With a nationwide network of Engineers working from offices in Dublin, Cork and Limerick nobody is in a better position to help you make the most of new digital communications.

Calyx Voice has strategic partnerships with some of the biggest and brightest global manufacturers including NEC, Avaya and Eyretel and can bring these massive resources right to your door.

We'll analyse your business, design the system, install it, maintain it and even finance it.

It's time to make that call...
